FLUID RECOVERY TANK

DRILLING FLUID MANAGEMENT SOLUTIONS

Total Oilfield Rentals LP offers fluid recovery tanks to increase your drilling efficiency by minimizing costs. Our FRT tank recovers valuable fluids for reuse, by de-watering water based drilling mud.

FEATURES

- 48m³ capacity – 6 active cells with individual mud guns
- (2) 4m³ polymer tanks with agitators
- 3 variable speed polymer injection pumps
- (1) 6x5 mission pumps for agitation, transferring fluids and refilling the polymer tanks
- Manifold for connecting various solids control equipment (centrifuges)
- Pumps controlled by a single touch screen HMI
- Trough for control of the centrifuge overflow allowing the user to divert fluid easily

POWER REQUIREMENTS

- 1 100A 480V 3W4P
- 1 60A 480V 3W4P
