

APOLLO™ FRAC POOLS

LARGE VOLUME STORAGE

Total Oilfield Rentals LP offers the Apollo™ fracturing fluid pool which holds up to 18,000 bbls (2900m³, 111ft diameter), 26,000 bbls (4200m³, 125ft diameter) or 40,800 bbls (6500m³, 156ft diameter) of fluid. Our frac pools are engineered for easy installation, transportation and dismantling. They are a great alternative for long term, large volume water storage needs.

CUSTOM ENGINEERED POOLS

Design Volume approximately

- 18,000bbls (2900m³), 111ft diameter, 10 panels
- 26,000bbls (4200m³), 125ft diameter, 12 panels
- 40,800bbls (6500m³), 156ft diameter, 15 panels

40 mil Liner and Protective Geotextile

Transportation Optimization

- 2-3 skid mounted loads per pool
- Accessories included

Engineered coupling system

- Fast to install
- Easy to use
- Fast to dismantle

Safe and easy access for operations

- Custom piping systems

All season applicability

Available upon request

- Insulated roof covers
- Insulated panels
- Wildlife protection
- Piping and pumping systems
- Operations support
