

# INVERT TANKS

## DOUBLE WALLED INVERT/HORIZONTAL TANKS

Total Oilfield Rentals LP offers a strong line-up of double walled invert/horizontal tanks to serve the oil and gas industry. Invert tanks are designed to have all fluids going in and out of the top of the tank, eliminating the need for berms. Total Oilfield Rentals LP invert tanks are available in both single chamber (85m<sup>3</sup>/530bbl) and dual chamber (42m<sup>3</sup>/264bbl per chamber) capacities. Spill trays under all hose connections ensure even the smallest of drips from hoses are contained, making the tank a very environmentally friendly unit.

### FEATURES

- Skidded 85m<sup>3</sup>/530bbl double walled invert storage tank.
- All piping through roof eliminating the need for secondary containment (i.e. berm or liners).
- Tank dimensions (10.5'W x 47'L x 12'H).
- Main tank – Dual chamber. Base oil and invert storage; 42m<sup>3</sup>/264bbl per chamber.
- Single tank – 85m<sup>3</sup>/530bbl for invert storage.
- Internal circulation lines.
- Spill trays under all hose connections.
- All systems complete with canopy lighting package, manual and electronic gauging systems, visual and audio level alarms, electric transfer pump and hose.
