

TRANSPORTATION FLEET

OILFIELD HAULING SERVICE

Total Oilfield Rentals LP has a large fleet of modern, well-maintained oilfield trucks, including boom trucks, bed trucks, texas beds, winch tractors, service trucks and fluid hauling. The average age of our trucks is under 3 years. This transportation fleet not only enables us to mobilize our rental equipment, but also allows us to offer a premier general oilfield hauling service.

Our trucking team specializes in the setup of tank farms and other Total Oilfield rental equipment, service rig moves, camp moves, and the moving of testing, production and construction equipment.

Total Oilfield Rentals LP also offers supervision for the larger moves to ensure both efficiency and safety.
